arthr.me

I'm a senior front-end developer with more than 15 years of experience crafting high-performance, accessible, and user-friendly experiences. I'm particularly skilled in modern JavaScript frameworks, design systems, and enterprise CMS platforms. I've successfully led cross-functional teams, developed internal tools, and made tangible performance improvements. I'm really passionate about semantic HTML, CSS architecture, and helping bridge the gap between technical solutions and business needs.

Professional experience

SENIOR WEBSITE ENGINEER, ABC FITNESS — 2025—PRESENT

Lead the development and maintenance of institutional and marketing campaign websites for a global fitness technology company.

- Manage the entire web stack, including PHP, WordPress, and TypeScript implementations.
- Own the configuration and deployment processes of the CI/CD pipeline.
- Maintain comprehensive user and technical documentation for the editorial team.

SENIOR FRONT-END DEVELOPER, COMPASS UOL — 2021—2025

Led front-end development for enterprise clients across healthcare, retail, and e-commerce sectors. Collaborated with diverse project teams, ranging from individual initiatives to cross-functional groups of 15+ developers.

- Enhanced Lighthouse performance scores from 45 to 94 on major client projects, including Camicado and Pfizer.
- Designed and implemented the Cuidamos Juntos platform for Pfizer Brasil, which experienced exponential growth within weeks, enabling daily content publishing with secure and user-friendly workflows.
- Developed and maintained essential development tools for internal teams, such as design systems, integration libraries, and technical documentation, thereby improving team efficiency and standardization.
- Implemented custom solutions on Salesforce, WordPress + WooCommerce, Drupal, and proprietary CMS platforms.

SENIOR FRONT-END DEVELOPER / TECHNICAL LEAD, VNDA ECOMMERCE — 2018—2021

As a key member of the technical support team, I was responsible for leading testing, debugging, and feature implementation for e-commerce storefronts. I served as a strategic liaison between client requirements and the development team's needs.

- Managed a team of seven colleagues, comprising three developers and four customer service representatives.
- Optimized the Customer Success technical workflow, resulting in expedited issue resolution through component-based development.
- Created comprehensive platform documentation, facilitating new developer onboarding and fostering consistent development practices.

FULLSTACK DEVELOPER, CÂMARA RIO-GRANDENSE DO LIVRO — 2017—2019

Built a robust WordPress platform for the 63rd, 64th, and 65th editions of the Feira do Livro de Porto Alegre, the biggest literary event in Latin America, where I designed and implemented a real-time event management system, allowing organizers to add and modify schedules while preventing conflicts.

FULLSTACK DEVELOPER, FAROL ESTÚDIO — 2014—2017

I was responsible for developing custom themes and maintaining WordPress sites and portals for museums, restaurants, unions, and nonprofit organizations.

FRONT-END DEVELOPER, EGBR — 2010—2014

First professional role while still in high school. I was a member of EGBR experimental dev group, developing with then-experimental technologies like WebGL, BuddyPress, and Google Maps API.

Education

Bachelor's Degree in Communication & Film; Unisinos — 2018.

Technical Degree in Computer Science; Instituto Federal Sul-rio-grandense — 2012.
